Otros profesores			

3.1 RESULTADOS DE APRENDIZAJE

- Identifying the relationships between economic agents, and how economic phenomena respond to these interdependencies.
- Identifying the economic concepts that are useful to address economic questions from the theoretical knowledge acquired.
- Using relevant growth theories to explain the economic reality of a country and the factors involved in the growth process.
- Developing and implementing appropriate policy measures in the light of the results of the econometric analysis of proposed models.

4. OBJETIVOS

This course aims at completing the training of the student offering theoretical knowledge to understand the dynamics of economic growth. Moreover, it is of particular interest to know the causes and determinants of this growth to develop appropriate policies that enable prosperity and growth.

6. ORGANIZACIÓN DOCENTE

CONTENIDOS

1	Stylized Facts of Economic Growth
1.1	Cross-country income differences. Income distribution differences across the world. Origins of income differences. Some correlations between income and growth.
2	Neoclassical growth theory
2.1	Solow growth model (1956). Technology as an exogenous input. Growth accounting and Total Factor Productivity. The convergence hypothesis.
2.2	The Cass-Koopmans-Ramsey Model
3	Endogenous growth models
3.1	AK model. Constant marginal productivity of capital. Romer growth model (1986). Capital spillovers and increasing returns to scale. Lucas growth model (1988). Human capital as an engine of growth. Barro growth model (1990). The role of public sector in economic growth.
4	New models of economic growth
4.1	Economic growth models based on R&D. International trade and technology diffusion. Growth models in open economies. Sustainable economic growth. The environmental issue.

7. MÉTODOS DE LA EVALUACIÓN

Descripción	Tipología	Eval. Final	Recuper.	%
Final Exam	Examen escrito	Sí	Sí	50,00
Problem sets	Otros	No	Sí	50,00
TOTAL				100,00
Observaciones				
There will be four/six problem sets. The problem sets will have a 50% weight in the final grade, with the remaining 50% coming from a final exam.				
Students who fail the course in the ordinary assessment period will go through a final exam on the extraordinary reassessment period for the 100% grade.				
Observaciones para alumnos a tiempo parcial				
Part-time students have two alternatives for their evaluation: 1.- They can follow continuous evaluation as full-time students. 2.- They can choose to be graded exclusively by the final exam.
