

SUBJECT TEACHING GUIDE

G1026 - Community Health Care

Degree in Nursing

Academic year 2019-2020

1. IDENTIFYING DATA					
Degree	Degree in Nursing			Type and Year	Compulsory. Year 3
Faculty	Faculty of Nursing				
Discipline	Subject Area: Community Nursing Module: Nursing Science				
Course unit title and code	G1026 - Community Health Care				
Number of ECTS credits allocated	6	Term	Semester based (2)		
Web	http://www.unican.es/centros/enfermeria				
Language of instruction	Spanish	English Friendly	No	Mode of delivery	Face-to-face

Department	DPTO. ENFERMERIA
Name of lecturer	ROSARIO FERNANDEZ PEÑA
E-mail	roser.fernandez@unican.es
Office	Facultad de Enfermería. Planta: + 0. DESPACHO PROFESORES (005)
Other lecturers	MONICA CUELI ARCE

3.1 LEARNING OUTCOMES

- Using available and suitable technologies for self-study, obtaining information and communication
- Describing the research process
- Develop relevant, viable and interesting research questions for Nursing
- Exposing the theoretical and conceptual framework of the quantitative and qualitative methodologies
- Identifying the characteristics of different types of studies
- Analyzing the situation, evolution and epidemiology of prevalent health problems in different territories , depending on age, sex, gender and other social determinants
- Itemizing intervention measures against the prevalent health problems
- Analyzing the situation, evolution, characteristics and causes of gender violence
- Explaining intervention measures, protocols and intervention resources against gender violence
- Applying the nursing process in simulated situations regarding lifestyles, health problems, gender violence and situations of individual and family crisis
- Demonstrating collaborative and teamwork skills

4. OBJECTIVES

- Acquire knowledge on quantitative and qualitative methodologies applied to research in the field of community nursing.
- Acquire knowledge, attitudes and skills necessary to provide nursing care to people in situations of chronicity and other health problems with a community approach

6. COURSE ORGANIZATION

CONTENTS

1	<p>Block I. Research Methodology</p> <p>Topic 1: The nursing research process. The research protocol. Dissemination of results: oral communication, scientific article and poster.</p> <p>Topic 2: Qualitative research: introduction, paradigms, designs and qualitative techniques applied in health</p> <p>Topic 3: Quantitative research: Methodology of Quantitative Research quantitative. Epidemiological designs. Questionnaires (designs and validity)</p> <p>Workshop 1: Scientific article and poster</p> <p>Workshop 2: Qualitative research: critical reading</p> <p>Workshop 3: Quantitative research: critical reading</p>
2	<p>Block II: General strategies for community health care</p> <p>Topic 4: Chronic disease: epidemiological and demographic situation. Chronicity Attention Strategies</p> <p>Topic 5: The complex chronic patient. Chronic patient care models and experiences. The case manager nurse</p> <p>Topic 6: Community health. Community Oriented Primary Care (COPC). Community participation.</p> <p>Workshop 4: The expert patient/Community participation</p> <p>Workshop 5: Group work I: presentation, resources and tutoring in subgroups according to the subject matter of the work</p>
3	<p>Block III. Prevalent health problems</p> <p>Topic 7: Diabetes Mellitus. General concepts, epidemiology, risk factors. Monitoring and control activities</p> <p>Topic 8: Hypertension: General concepts, epidemiology, risk factors. Monitoring and control activities</p> <p>Topic 9: Obesity: General Concepts, Epidemiology, Risk Factors. Monitoring and control activities</p> <p>Topic 10: Dyslipemia: General concepts, epidemiology, risk factors. Monitoring and control activities</p> <p>Topic 11: Cancer. General concepts, epidemiology, risk factors.</p> <p>Topic 12: Gender-based violence. Female genital mutilation. Protocol of care from Primary Health Care</p> <p>Workshop 6: Nursing care for the hypertensive patient. ABPM and BPSM: Measurement and interpretation of results</p> <p>Workshop 7: Estimating Cardiovascular Risk: Calculation Methods</p> <p>Workshop 8: Nursing care for patients with chronic lower limb problems I: screening and diagnosis</p> <p>Workshop 9: Nursing care for patients with chronic lower limb problems II: compression therapies</p>
4	<p>Block IV: Communicable diseases</p> <p>Topic 13: Immunizations and vaccines: classification, administration, preservation and transport. Calendar of vaccine in the adult</p> <p>Topic 14: Major communicable diseases</p> <p>Workshop 10: Adult vaccination: case study</p> <p>Workshop 11: Group work II: group exhibition and sharing</p>

7. ASSESSMENT METHODS AND CRITERIA

Description	Type	Final Eval.	Reassessn	%
Knowledge exam	Written exam	No	Yes	60,00
Workshop	Written exam	No	No	25,00
Teamwork, report	Work	No	No	15,00
TOTAL				100,00
Observations				
<p>The final mark of the subject will be the result of the sum of the marks obtained in the evaluation of all the academic activities scheduled according to the percentage that correspond to each part. The course will be passed with a minimum final mark of 5 over 10.</p> <p>Not passing the final exam or not carrying out any of the formative activities does not exempt from being graded with the marks obtained in those which are done.</p> <p>The student will be considered as 'not presented' only in the case that he/she does not attend to none of the gradable activities, and thus, has not received any grade.</p>				
Observations for part-time students				
<p>Part-time students will be given the choice to participate in the following assessment system:</p> <ul style="list-style-type: none"> - Take the final exam with a percentage weight of 100% <p>In order to take part in this modality of evaluation, the corresponding request must be made to the responsible teaching staff at the beginning of the course.</p>
