

GUÍA DOCENTE ABREVIADA DE LA ASIGNATURA

G1901 - Materials

Grado en Ingeniería Mecánica

Curso Académico 2021-2022

1. DATOS IDENTIFICATIVOS				
Título/s	Grado en Ingeniería Mecánica		Tipología v Curso	Obligatoria. Curso 2
Centro	Escuela Técnica Superior de Ingenieros Industriales y de Telecomunicación			
Módulo / materia	MATERIA MATERIALES MÓDULO COMÚN A LA RAMA INDUSTRIAL			
Código y denominación	G1901 - Materials			
Créditos ECTS	6	Cuatrimestre	Cuatrimestral (1)	
Web				
Idioma de impartición	Inglés	Forma de impartición	Presencial	

Departamento	DPTO. CIENCIA E INGENIERIA DEL TERRENO Y DE LOS MATERIALES		
Profesor responsable	JOSE ANTONIO CASADO DEL PRADO		
E-mail	jose.casado@unican.es		
Número despacho	E.T.S. de Ingenieros de Caminos, Canales y Puertos. Planta: + 0. DESPACHO (0009)		
Otros profesores	ANA ISABEL CIMENTADA HERNANDEZ BORJA ARROYO MARTINEZ ISRAEL ENRIQUE SOSA YEPEZ		

3.1 RESULTADOS DE APRENDIZAJE

- Correlate the processing techniques, the structure, and the properties with the behavior of the materials.
- Acquire basic knowledge of the different families of materials commonly used in industrial applications
- Define, analyze, evaluate and compare the physical-mechanical properties of industrial and construction materials.
- Know the basic techniques of production, conformation and transformation of industrial materials.

4. OBJETIVOS

- Correlate the processing techniques, the structure, and the properties with the behavior of the materials.
- Acquire basic knowledge of the different families of materials commonly used in industrial applications .
- Define, analyze, evaluate and compare the physical-mechanical properties of industrial and construction materials.
- Know the basic techniques of production, conformation and transformation of industrial materials.

6. ORGANIZACIÓN DOCENTE

CONTENIDOS

1	<p>Block I.- FUNDAMENTALS OF MATERIALS SCIENCE</p> <p>Lesson 1.- Introduction to Materials. Description, composition, properties and applications</p> <p>Lesson 2.- Hooke's Law. Analysis of physical properties</p> <p>Lesson 3.- Crystalline and Amorphous Structure. Structure and behavior</p> <p>Lesson 4.- Tensile Strength and Hardness</p> <p>Lesson 5.- Fast Fracture and Toughness</p> <p>Lesson 6.- Fatigue Failure</p> <p>Lesson 7.- Creep</p> <p>Lesson 8.- Oxidation and Corrosion</p>
2	<p>Block II.- FUNDAMENTALS OF MATERIALS TECHNOLOGY</p> <p>Lesson 9.- Phase diagrams</p> <p>Lesson 10.- Iron Alloys</p> <p>Lesson 11.- Other Metal Alloys</p> <p>Lesson 12.- Treatments</p> <p>Lesson 13.- Production and Conformation of metals. Processes for the production of pieces.</p> <p>Lesson 14.- Ceramics and Glasses</p> <p>Lesson 15.- Polymers</p> <p>Lesson 16.- Composite Materials</p> <p>Lesson 17.- Mortars and Concrete</p> <p>Lesson 18.- Materials Selection</p>

7. MÉTODOS DE LA EVALUACIÓN

Descripción	Tipología	Eval. Final	Recuper.	%
BLOCK I assessment	Examen escrito	No	Sí	40,00
BLOCK II assesment	Examen escrito	No	Sí	40,00
Continuous Assesment	Otros	No	No	20,00
TOTAL				100,00
Observaciones				
<p>The final grade of the subject will be obtained by means of the following formula: $0,4 \cdot (\text{grade Block I}) + 0,4 \cdot (\text{grade Block II}) + \text{Continuous Evaluation grade (maximum 2 points)}$ The grade of the Continuous Evaluation will be saved for the September Call for all those students who do not pass the Subject in the February Call. Neither of the two blocks will be saved for later courses.</p> <p>The uncertainty associated with the possible non-compliance with the social distancing decreed by the health authorities may condition the evaluation system. If necessary, the assessment may be adapted to the use of the most appropriate telematic means available, in order to measure the knowledge of the students about theoretical and practical concepts.</p>				
Criterios de evaluación para estudiantes a tiempo parcial				
<p>In general, the evaluation of part-time students will be based on what is established for this purpose in the Evaluation Regulations of the University of Cantabria. In any case, the unique circumstances of each student who is in this situation will be assessed individually and the right of these students to overcome the subject in an unique evaluation process will be guaranteed.</p>
