

SUBJECT TEACHING GUIDE

M1698 - Government of information technologies

Master's Degree in computing engineering

Academic year 2021-2022

1. IDENTIFYING DATA					
Degree	Master's Degree in computing engineering			Type and Year	Compulsory. Year 1
Faculty	Faculty of Sciences				
Discipline	ADMINISTRATION AND MANAGEMENT				
Course unit title and code	M1698 - Government of information technologies				
Number of ECTS credits allocated	3	Term	Semester based (2)		
Web	http://www.istr.unican.es/assignaturas/gobierno_de_las_ti/				
Language of instruction	Spanish	English Friendly	No	Mode of delivery	Face-to-face

Department	DPTO. INGENIERÍA INFORMÁTICA Y ELECTRÓNICA
Name of lecturer	JULIO LUIS MEDINA PASAJE
E-mail	julio.medina@unican.es
Office	Facultad de Ciencias. Planta: + 3. DESPACHO DE PROFESORES (3059)
Other lecturers	MARIA VICTORIA LLAMAZARES LOPEZ

3.1 LEARNING OUTCOMES

- To have a comprehensive view of the way IT are to be managed , including the issues, the challenges and the increasingly important role they have in the development of business strategies, operation, and management. All of this in the aim of improving the overall performance and profitability of an organization.
- To know the responsibilities and liabilities of IT management personnel.
- Capacity to plan, develop, execute and maintain effective strategies and policies for IT governance , mastering the related processes, techniques and tools.
- To know how to manage, evaluate, estimate, prioritize, finance, value, assign, and follow requests for IT services in a way coherent and aligned with the core organization business.
- To know how to assign IT resources to the activities with largest added value in business.
- To be able to improve the activities in an organization , its response capacity, its reliability, and the professional qualifications of its staff.
- To know the various management models that can be applied and the importance of setting up an IT architecture that is integrated and centralized, and that is based on standards and good practices codes.
- To know the main standards and good practices codes in the market and the pros and cons of implementing their proposals in an organization.

4. OBJECTIVES

- To instill a comprehensive view of the way IT should be managed , including the issues, the challenges and the increasingly important role they have in the development of business strategies, operation, and management. All of this in the aim of improving the overall performance and profitability of an organization.
- To present the responsibilities and liabilities of IT Management personnel .
- To show how to plan, develop, execute and maintain effective strategies and policies for IT governance , mastering the related processes, techniques and tools.
- To provide strategies to manage, evaluate, estimate, prioritize, finance, value, assign, and follow requests for IT services in a way coherent and aligned with the core organization business.
- To discuss criteria to assign IT resources to the activities with largest added value in business .
- To stimulate the search of strategies to improve the activities in an organization , its response capacity, its reliability, and the professional qualifications of its staff.
- To propose management models that can be applied and highlight the importance of setting up an IT architecture that is integrated and centralized, and that is based on standards and good practices codes.
- To present the main standards and good practices codes in the market and the pros and cons of implementing their proposals in an organization.

6. COURSE ORGANIZATION

CONTENTS	
1	Part 0 - Introduction to the subject
2	Part 1 – IT and the organizations: The fundamental equations of an organization. Organizational models of IT departments and the importance of IT.
3	Part 2 - IT governance: What is government? Government, governance and management. Mission and vision of the organizations. Strategies, plans, and projects. Governance and essential management essential tasks. Roles and responsibilities. Principles of corporative governance.
4	Part 3 – Standards and frameworks: the need of norms and standards. ISO 20000. ISO 38500. COBIT
5	Part 4 - Process of Implementing IT government. The implementation process. Tools. Cases analysis.
6	Practical assignments

7. ASSESSMENT METHODS AND CRITERIA

Description	Type	Final Eval.	Reassessn	%
Written quiz involving all topics discussed.	Written exam	No	Yes	40,00
Practical assignments that compose the practical evaluation of the subject.	Work	No	Yes	60,00
TOTAL				100,00

Observations

The evaluation will be made along the teaching period of the subject.

The final grade is calculated as the weighted arithmetic average of all evaluations along the teaching period, in the following way:

- 40% (T) Written quiz involving all topics discussed.
- 60% (A) Written assignments of the practical experiences of the subject.

In order to be able to pass the subject a student needs to get a score of 4.00 or more in the written quiz (T).

To recover the written (T) exam, the students may ask for an additional exam in June and/or in a recovery period before the deadline to upload final marks. This exam will evaluate the theoretical contents of the subject and will have in the final mark the same weight of the (T) exam (i.e. 40%).

The practical assignments (A) will be delivered along the course towards the end of each module in printed or digital form. In exceptional cases they may be delivered later, but not later than ten days before the end of June, the latest. If it is delivered in the recovery period they have to be delivered before or up to ten days before the date fixed by the Faculty to upload the final marks. There is only one call per academic year. If the subject is not passed in the regular evaluation periods it can be recovered in the recovery exams period.

If the maximum number of "Matrículas de Honor" (outstanding marks) is fulfilled with those given in the regular evaluation period, students that sit for recovery exams in the recovery exams period cannot be eligible for any additional of those marks.

Observations for part-time students

The evaluation will be made along the teaching period of the subject. Part-time students have the opportunity to be evaluated in a similar way by sitting for the recovery examinations offered in June and in the recovery exams period before the deadline to upload final marks. Besides, the written assignments that comprise the practical evaluation of the subject can be delivered in a specific recovery period, which shall not be later than ten days before the date fixed by the Faculty to upload the final marks.
