

## SUBJECT TEACHING GUIDE

M196 - Statistical Techniques for Social Sciences

Master's Degree in Economics: Instruments of Economic Analysis

Academic year 2021-2022

1. IDENTIFYING DATA					
Degree	Master's Degree in Economics: Instruments of Economic Analysis			Type and Year	Optional. Year 1
Faculty	Faculty of Economics and Business Studies				
Discipline	Optional Subjects Module				
Course unit title and code	M196 - Statistical Techniques for Social Sciences				
Number of ECTS credits allocated	3	Term	Semester based (1)		
Web					
Language of instruction	Spanish	English Friendly	No	Mode of delivery	Face-to-face

Department	DPTO. ECONOMIA				
Name of lecturer	FAUSTINO PRIETO MENDOZA				
E-mail	faustino.prieto@unican.es				
Office	Edificio de las Facultades de Derecho y Ciencias Económicas y Empresariales. Planta: + 1. DESPACHO FAUSTINO PRIETO MENDOZA (E114)				
Other lecturers	CARMEN TRUEBA SALAS LORENA REMUZGO PEREZ				

3.1 LEARNING OUTCOMES
- To use tools for analyzing economic inequality
- To use probabilistic distributions to solve economic problems
- To be able to estimate parameters and hypothesis testing in economic problems from different fields
- To be able to identify situations where power-law models can be used and applied properly

#### 4. OBJECTIVES

- To know probabilistic models for economic problems
- To know the tools to estimate parameters and hypothesis testing in economic problems
- Applications of the power-law models in Economics
- To learn quantitative tools for analyzing economic inequality

#### 6. COURSE ORGANIZATION

##### CONTENTS

1	Probabilistic tools and statistical inference.
1.1	Review of the main concepts of probability. Probabilistic distributions.
1.2	Review of the main concepts of statistical inference.
1.3	Power-law models in social sciences. Specification, estimation and validation.
2	Statistical methods.
2.1	Basic tools for analyzing economic inequality, with unidimensional and multidimensional models.
2.2	Estimation of income distributions with grouped data.
2.3	Parametric modelling of the income distribution with complete and limited information

#### 7. ASSESSMENT METHODS AND CRITERIA

Description	Type	Final Eval.	Reassessn	%
Final assigment	Work	No	Yes	50,00
Exam	Written exam	No	Yes	50,00
<b>TOTAL</b>				<b>100,00</b>
<b>Observations</b>				
Regular students, who fail the course on the ordinary examination will go through an extraordinary call, for the 100% grade, including all course contents. In both calls (ordinary and extraordinary), the score obtained by the student will be the weighted average of the grades obtained in a written exam (50%) and an individual work (50%),				
<b>Observations for part-time students</b>				
The evaluation method for part-time students will consist of a written exam (50%) and an individual work (50%), in both calls (ordinary and extraordinary).
