

SUBJECT TEACHING GUIDE

G1975 - Transport Systems

Degree in Civil Engineering

Academic year 2022-2023

1. IDENTIFYING DATA					
Degree	Degree in Civil Engineering			Type and Year	Compulsory. Year 3
Faculty	School of civil Engineering				
Discipline	FUNDAMENTALS OF TRANSPORT ENGINEERING				
Course unit title and code	G1975 - Transport Systems				
Number of ECTS credits allocated	6	Term	Semester based (1)		
Web					
Language of instruction	Spanish	English Friendly	No	Mode of delivery	Face-to-face

Department	DPTO. TRANSPORTES Y TECNOLOGIA DE PROYECTOS Y PROCESOS				
Name of lecturer	JOSE MARIA DIAZ PEREZ DE LA LASTRA				
E-mail	josemaria.diaz@unican.es				
Office	E.T.S. de Ingenieros de Caminos, Canales y Puertos. Planta: + 1. DESPACHO (1007)				
Other lecturers	JOSE LUIS MOURA BERODIA				

3.1 LEARNING OUTCOMES

- Conceptualize transportation systems and their relationships with the territorial and economic system.
- Recognize the specific characteristics and regulations of each transport mode (road, rail, maritime, air and freight).
- Apply the knowledge and methods necessary to diagnose the accessibility of a territory.
- Apply basic techniques and tools to transport demand analysis and forecasting.
- Analyze and evaluate transport systems from the point of view of their externalities

4. OBJECTIVES

- To introduce the student to Transport Engineering , from the perspectives of the infrastructure and the transportation services.
- Notice the link between transportation (and its infrastructures) and the structuring of the territory. Use accesibility indicators to analyse transport networks.
- Learn the peculiarities of mobility in urban areas and mass transit systems. Understand the basic concepts of transport planning and travel demand study.

6. COURSE ORGANIZATION

CONTENTS

1	INTRODUCTION AND CHARACTERISTICS OF TRANSPORT SYSTEMS. Transport as a system. Transport infrastructures and economic processes. Characteristics of transport modes and regulatory framework.
2	TRANSPORT AND TERRITORIAL SYSTEM. Concept and measure of accessibility. Types of accessibility indicators. Networks models to study accessibility.
3	URBAN TRANSPORT. Mobility in urban areas. Collective transport. Urban transport networks. Design and operation of urban transport systems.
4	TRANSPORT DEMAND. Concept of demand. Analysis of the current passenger and freight demand. Potential demand. Demand models.
5	TRANSPORTATION EXTERNALITIES. Externalities. The impacts on the environment. Other effects.

7. ASSESSMENT METHODS AND CRITERIA

Description	Type	Final Eval.	Reassessn	%
Final Exam	Written exam	Yes	Yes	60,00
Work. Final deliverable.	Work	No	Yes	30,00
Face-to-face activity in the classroom.	Others	No	No	10,00
TOTAL				100,00
Observations				
In case of a new health alarm due to COVID-19 and if the guidelines of the health and educational authorities do not allow face-to-face evaluation in the classroom, a remote evaluation system will be adopted.				
Students who request advanced evaluation of the subject will take a written exam of the subject with theoretical and practical content.				
Observations for part-time students				
Part-time students must present the Final Work and take the final written exam for the subject.				

8. BIBLIOGRAPHY AND TEACHING MATERIALS
