### **3.1 LEARNING OUTCOMES**

- It includes the mechanical and rheological behavior of concrete and steel reinforcement materials, both in isolation and as part of the structural parts.

- Applies safety criteria to reinforced concrete structures.

- Identifies and evaluates the actions to be considered in the project of reinforced concrete structures.

- Analyze, check and size reinforced concrete structural elements in situations of exhaustion.

- Analyze, check and size reinforced concrete structural elements in service situations.

School of civil Engineering

### 4. OBJECTIVES

- 1. The student will be able to establish and/or interpret safety criteria and procedures in concrete structures.
- 2. The student will be aware of the various properties of the component materials of reinforced concrete.

3. The student will be aware of the problem of durability in concrete structures as well as the resolution of associated problems.

4. The student will be able to establish and use the methodologies for analysis and verification of concrete structures.

5. The student will be aware of the aspects that govern the control of the project, materials and the execution of concrete structures.

| 6. COI   | 6. COURSE ORGANIZATION  |  |  |  |  |  |  |
|----------|---|--|--|--|--|--|--|
| CONTENTS |   |  |  |  |  |  |  |
| 1        | <ol> <li>Introduction to the subject.</li> <li>Historical notes on concrete.</li> <li>Joint behavior of steel and concrete that has enabled its success as a composite material.</li> </ol>   |  |  |  |  |  |  |
| 2        | 1. Loads.<br>2. Characteristics of concrete and steel materials   |  |  |  |  |  |  |
| 3        | <ol> <li>Structural analysis. Methods.</li> <li>Data necessary for linear, plastic or non-linear modelling. Materials and geometry.</li> <li>Shrinkage and creep.</li> </ol>  |  |  |  |  |  |  |
| 4        | <ol> <li>Durability in concrete. Deterioration of the concrete mass. Steel corrosion.</li> <li>Identification of the factors of aggressiveness on the concrete.</li> <li>Protective measures.</li> <li>Maintenance of concrete structures.</li> </ol>     |  |  |  |  |  |  |
| 5        | <ol> <li>Limit states, concept and method.</li> <li>Serviceability limit states. Deformations and cracking.</li> <li>Ultimate limit states. Axil, bending, shear, shear and torsion.</li> </ol>   |  |  |  |  |  |  |
| 6        | <ol> <li>Strut and tie calculation</li> <li>Typical application cases. The node, concentrated load, dimension changes in beams and columns.</li> </ol>  |  |  |  |  |  |  |
| 7        | <ol> <li>Typical structural elements. The beam, the pillar, the slab, the foundation elements.</li> <li>Organization and exploded view of the rebar in the structural elements.</li> <li>The execution. Problems associated with each element.</li> </ol> |  |  |  |  |  |  |
| 8        | <ol> <li>Basic principles of control</li> <li>Procedure control versus product control.</li> <li>Project control.</li> </ol>  |  |  |  |  |  |  |
| 9        | <ol> <li>Control of reception of materials.</li> <li>Product conformity control</li> <li>Execution control</li> <li>Maintenance. Maintenance manual</li> <li>Introduction to prestressed concrete</li> </ol>  |  |  |  |  |  |  |

School of civil Engineering

| 7. ASSESSMENT METHODS AND CRITERIA  |              |             |           |       |  |  |  |
|---|--------------|-------------|-----------|-------|--|--|--|
| Description   | Туре         | Final Eval. | Reassessn | %     |  |  |  |
| Partial exam 1  | Written exam | No          | No        | 15,00 |  |  |  |
| Partial exam 2  | Written exam | No          | No        | 15,00 |  |  |  |
| Final exam 1  | Written exam | No          | Yes       | 40,00 |  |  |  |
| Respond to the tasks raised during the course   | Work         | No          | Yes       | 30,00 |  |  |  |
| TOTAL 100,00  |              |             |           |       |  |  |  |
| Observations  |              |             |           |       |  |  |  |
| Observations for part-time students   |              |             |           |       |  |  |  |
| Part-time students will only do the final exam, which will be awarded a percentage of 100% of their evaluation. |              |             |           |       |  |  |  |
