

SUBJECT TEACHING GUIDE

M1480 - Cargo Handling and Stowage: Application of Integrated Management Systems Master's Degree in Nautical Engineering and Maritime Management

Academic year 2022-2023

1. IDENTIFYING DATA					
Degree	Master's Degree in Nautical Engineering and Maritime Management			Type and Year	Compulsory. Year 1
Faculty	School of Maritime Engineering				
Discipline	Cargo Handling and Stevadoring, Control of the Ship's Functioning and Care of Persons on Board				
Course unit title and code	M1480 - Cargo Handling and Stowage: Application of Integrated Management Systems				
Number of ECTS credits allocated	6	Term	Semester based (2)		
Web	https://ocw.unican.es/course/view.php?id=306				
Language of instruction	Spanish	English Friendly	No	Mode of delivery	Combination of face-to-face and online training

Department	DPTO. CIENCIAS Y TECNICAS DE LA NAVEGACION Y DE LA CONSTRUCCION NAVAL				
Name of lecturer	FRANCISCO JOSE CORREA RUIZ				
E-mail	francisco.correa@unican.es				
Office	E.T.S. de Náutica. Planta: + 2. DESPACHO (266)				
Other lecturers	FRANCISCO VUELTA FERNANDEZ				

3.1 LEARNING OUTCOMES

- Maritime transport review.
- Integration of quality, safety, security and environmental management system on the cargo handling and stowage.

4. OBJECTIVES

Knowledge about seaborne trade of goods and passengers.
 Knowledge about world fleet.
 Planning the loading, stowage and securing of the cargo on board.
 Knowledge about cargo international codes, for example, IMSBC, BLU, IMDG...
 Application of Integrate management system to the cargo handling and stowage.
 Development of procedures and processes to load and stowage the goods on board according to quality, safety and environmental integrate criteria.

6. COURSE ORGANIZATION

CONTENTS

1	<p>Cargo handling and stowage: integrated management system</p> <p>.1 Commodities and vessels. Seaborne trade of goods and passengers. World fleet.</p> <p>.2 Bulk carriers: Integration of quality, safety and environmental processes to the cargo handling and stowage.</p> <p>.3 Tanker vessels: Integration of quality, safety and environmental processes to the cargo handling and stowage.</p> <p>.4 Container carriers: Integration of quality, safety and environmental processes to the cargo handling and stowage.</p> <p>.5 Ro-Pax: Integration of quality, safety and environmental processes to the cargo handling and stowage.</p>
---	--

7. ASSESSMENT METHODS AND CRITERIA

Description	Type	Final Eval.	Reassessn	%
Develop and implement an integrated management system to cargo handling and stowage on determinate commodity and cargo ship. Drawing process maps and procedure guides.	Others	No	Yes	30,00
Test exam via virtual classroom.	Activity evaluation with Virtual Media	No	Yes	20,00
A first task will be to develop a flow chart of the process and a management system for loading and stowing bulk cargoes in bulk carriers. Second one, will be the same report about a vessel where the student had have an experience.	Work	No	Yes	20,00
Public presentation, in class, of one of the two works developed.	Others	No	No	15,00
Participation in forums	Activity evaluation with Virtual Media	No	No	15,00
		No	No	0,00
		No	No	0,00
TOTAL				100,00
Observations				
The student can do the academic work and test exam or can do final exam.				
Observations for part-time students				
Part time students must do final exam.
