

## SUBJECT TEACHING GUIDE

### M2131 - Models of Water Treatment System

#### Master's Degree in Environmental Engineering and Management

Academic year 2022-2023

1. IDENTIFYING DATA					
Degree	Master's Degree in Environmental Engineering and Management			Type and Year	Optional. Year 1
Faculty	School of civil Engineering				
Discipline	ENVIRONMENTAL MODELLING				
Course unit title and code	M2131 - Models of Water Treatment System				
Number of ECTS credits allocated	3	Term	Semester based (2)		
Web	<a href="https://egela.ehu.eus/">https://egela.ehu.eus/</a>				
Language of instruction	Spanish	English Friendly	Yes	Mode of delivery	Face-to-face

Department	DPTO. CIENCIAS Y TECNICAS DEL AGUA Y DEL MEDIO AMBIENTE				
Name of lecturer	AMAYA LOBO GARCIA DE CORTAZAR				
E-mail	amaya.lopez@unican.es				
Office	E.T.S. de Ingenieros de Caminos, Canales y Puertos. Planta: + 2. DESPACHO - Area de Tecnologías del Medio Ambiente (2033)				
Other lecturers	RUBEN DIEZ MONTERO				

3.1 LEARNING OUTCOMES
- Developing a theoretical analysis of a system for water treatment, adapted to its scope (design or simulation).
- Building design models for water treatment processes, based on a spreadsheet.
- Building steady-state simulation models for water treatment systems, based on a spreadsheet.
- Building dynamic simulation models for water treatment systems, based on a spreadsheet.
- Describing the most common simulation models for water treatment and applying them to real cases.
- Modelling real water treatment systems based on widespread simulation software.
- Calibrating simulation models of water treatment systems with real data.
- Using models for scenario analysis, diagnosis and proposal of improvements for water treatment systems.

#### 4. OBJECTIVES

Identifying, understanding and using the principle words and concepts regarding modelling of water treatment systems.
Applying simulation models for the design, diagnosis, monitoring and improvement of water treatment systems.
Developing design models for water treatment systems based on a spreadsheet.
Developing simulation models for water treatment processes.

#### 6. COURSE ORGANIZATION

CONTENTS	
1	An introduction to models. Theoretical analysis of systems.
2	Calculation and design models
3	Steady-state and dynamic simulation models. Spatial discretization.
4	IWA models of biological processes for water treatment. ASIM
5	Widespread software for simulation of water treatment systems. BIOWIN

#### 7. ASSESSMENT METHODS AND CRITERIA

Description	Type	Final Eval.	Reassessn	%
Questionnaires	Written exam	No	Yes	30,00
Practical cases	Work	No	Yes	40,00
Computer practices	Others	No	Yes	15,00
Course work	Work	No	Yes	15,00
TOTAL				100,00
Observations				
Observations for part-time students				
The assessment for part-time student includes all the activities set for the rest of students, with identical weightings.				

#### 8. BIBLIOGRAPHY AND TEACHING MATERIALS
