

SUBJECT TEACHING GUIDE

672 - Construction and Installations

Master's Degree in Environmental Engineering and Management

Academic year 2023-2024

1. IDENTIFYING DATA			
Degree	Master's Degree in Environmental Engineering and Management	Type and Year	Optional. Year 1
Faculty	School of civil Engineering		
Discipline	Complement in Training		
Course unit title and code	672 - Construction and Installations		
Number of ECTS credits allocated	3	Term	Semester based (1)
Web			
Language of instruction	Spanish	English Friendly	No
		Mode of delivery	Face-to-face

Department	DPTO. TRANSPORTES Y TECNOLOGIA DE PROYECTOS Y PROCESOS
Name of lecturer	DANIEL CASTRO FRESNO
E-mail	daniel.castro@unican.es
Office	E.T.S. de Ingenieros de Caminos, Canales y Puertos. Planta: + 1. DESPACHO DANIEL CASTRO FRESNO (1011)
Other lecturers	JOSE RAMON IBAÑEZ DEL RIO ALMUDENA DA COSTA GARCIA ANDRES GARCIA GOMEZ IGNACIO LOMBILLO VOZMEDIANO FRANCISCO JAVIER BALBAS GARCIA CARLOS THOMAS GARCIA

3.1 LEARNING OUTCOMES

- Apply basic technical vocabulary and terminology in the field of construction and installations
- Identify the characteristics of the main construction materials
- To know and apply at a basic level the theory of resistance of materials , and specifically, the design of walls and retaining structures.
- To understand and apply at a basic level the mechanics of fluids applied to piping and pumping.
- To know the basic aspects of electrical engineering applied to construction and installations.

4. OBJECTIVES

The main objective of the subject for the student is to know the basic technical vocabulary and terminology used in construction and installation projects, as well as to provide them with a basic knowledge of the main characteristics of construction materials, their mechanical and physical properties.

In addition, the students must know, at a basic level, the operation of surface foundation and rigid containment structures and other aspects of fluid mechanics applied to piping and pumping and electrical engineering applied to construction and installations.

6. COURSE ORGANIZATION

CONTENTS	
1	1. Introduction to construction elements
2	2. Introduction to building materials. Sustainable materials.
3	3. Introduction to electrical installations
4	4. Introduction to fluid mechanics: pipes and pumps.
5	5. Introduction to resistance of materials
6	6. Introduction to geotechnics and foundation and containment structures

7. ASSESSMENT METHODS AND CRITERIA				
Description	Type	Final Eval.	Reassessn	%
Partial tests by modules	Written exam	No	Yes	65,00
Practical cases	Others	No	Yes	20,00
Module 1 evaluation with virtual support.	Activity evaluation with Virtual Media	No	No	15,00
TOTAL				100,00
Observations				
<p>Only for duly justified reasons (eg sanitary restrictions) the evaluation tests may be organized remotely, with prior authorization from the Center's Management.</p> <p>Note: According to RD 1125/2003 on the European credit system and the qualification system in university degrees of an official nature and valid throughout the national territory, the Results obtained by the student in each of the subjects of the study plan will be graded based on the following numerical scale from 0 to 10, with an expression of one decimal place, at which you can add its corresponding qualitative rating: 0.0-4.9: Fail (SS) 5.0-6.9: Pass (AP) 7.0-8.9: Good (NT) 9.0-10: Excellent (SB).</p>				
Observations for part-time students				
<p>The student who follows the subject part-time must take a single exam, which will consist of a 1st part (85%) in relation to the partial written tests by modules and a 2nd part (15%) in relation to the practical cases corresponding to module 5.</p>
