

SUBJECT TEACHING GUIDE

G119 - Mathematics for Secondary Education

Double Degree in Physics and Mathematics Degree in Mathematics

Academic year 2023-2024

1. IDENTIFYING DATA					
Degree	Double Degree in Physics and Mathematics Degree in Mathematics			Type and Year	Optional. Year 5 Optional. Year 4
Faculty	Faculty of Sciences				
Discipline	Subject Area: Mathematics for Secondary Education Mention in Pure and Applied Mathematics				
Course unit title and code	G119 - Mathematics for Secondary Education				
Number of ECTS credits allocated	6	Term	Semester based (2)		
Web	https://moodle.unican.es/course/view.php?id=3659				
Language of instruction	Spanish	English Friendly	No	Mode of delivery	Face-to-face

Department	DPTO. MATEMATICAS, ESTADISTICA Y COMPUTACION
Name of lecturer	JOSE MANUEL DIEGO MANTECON
E-mail	josemanuel.diego@unican.es
Office	Facultad de Ciencias. Planta: + 0. DESPACHO JOSE MANUEL DIEGO MANTECON (0060)
Other lecturers	RAUL FERNANDEZ COBOS

3.1 LEARNING OUTCOMES

- Connecting the mathematical contents of Secondary Education with the phenomena that originate them, recognizing the formal aspects involved together with its presence in everyday situations and those others that come from multidisciplinary fields (Physics, Biology, Economics, etc.).
- Recognizing the types of students' reasoning, proposing tasks that guide them, diagnosing their errors, and proposing the corresponding processes of intervention.
- Selecting and sequencing activities for school learning; analyzing the various problems that arise in learning situations
- Having specific criteria, techniques, and instruments for the evaluation of mathematical knowledge.
- Knowing resources and materials (computational, audiovisual, manuals, bibliographical, etc.) and using them properly in the teaching of Mathematics in Secondary Education.

4. OBJECTIVES

- Presenting idiosyncratic aspects of school mathematics and the problems derived from its teaching, complementing the formal vision that students have of it.
- Developing student professional skills related to the design of teaching mathematical content for Secondary Education
- Developing student commitment to training, and a critical and reflective attitudes towards Mathematics Education.

6. COURSE ORGANIZATION

CONTENTS	
1	Block 1: Introduction to Secondary Education, teaching planning and cultural perspective of mathematics teaching
2	Block 2: Learning mathematics: problem-solving strategies, errors and difficulties
3	Block 3: Learning approaches and resources

7. ASSESSMENT METHODS AND CRITERIA

Description	Type	Final Eval.	Reassessn	%
Assessment activity related to blocks 1 and 2 (50%)	Work	Yes	Yes	50,00
Assessment activity related to block 2 (25%)	Work	Yes	Yes	25,00
Assessment activity related to block 3 (25%)	Work	Yes	Yes	25,00
TOTAL				100,00
Observations				
<ul style="list-style-type: none"> - Class participation will be valued. - The final mark for the subject will be the weighted average of the individual grades of each of the three assessment activities. Calculating the average mark will require a minimum of 4 points out of 10 in the assessment activity related to blocks 1 and 2. -The assessment activity related to blocks 1 and 2 will be defended through an oral presentation. - In the extraordinary call, all subject contents will be evaluated by means of a 'Final Exam'. 				
Observations for part-time students				
For students enrolled under the part-time modality, the final mark will be the one obtained in the 'final exam'.
