3.1 LEARNING OUTCOMES

- Interpretation and implementation of standardized technical drawing.
- Use of CAD Systems for:
 - 1.Solving geometric problems.
 - 2.3D representation and visualization of parts and elements.
 - 3.Make and interpret technical drawings for engineering projects.

4. OBJECTIVES

Represent parts and elements in a graphical document, using descriptive geometry, graphical projection and technical drawing standards.

Expose by a graphical, oral and written way ideas of design and interpretation of engineering drawings.

6. COURSE ORGANIZATION

CONTENTS

1	Metric and descriptive geometry. Isometric and Cavalier projection.
2	Metric and descriptive geometry. Projections of curves, surfaces and solids.
3	Technical and engineering drawings. CAD Systems.
4	Metric and descriptive geometry. Orthographic Projection. Topographic representation.

7. ASSESSMENT METHODS AND CRITERIA

Description	Type	Final Eval.	Reassessn	%
Three partial tests (22,5%-22,5%-45%).	Written exam	No	Yes	90,00
Classroom works and projects.	Work	No	Yes	10,00
TOTAL				100,00
Observations				
Students who do not pass the continuous assessment (average of 6 in the partial tests), may make the final test, similar to the three subtests, which is completed with the qualification of class work and presentation (10%), and tests partial (30%). Online evaluation will be applied to these same works, practical laboratory exercises and written tests, in case it would be impossible to carry out the onsite evaluation because of a new health alert by COVID-19.				
Observations for part-time students				
Part-time students have same evaluation criteria that full-time students.
