

SUBJECT TEACHING GUIDE

G343 - Statistics I

DOUBLE DEGREE IN ADMINISTRATION AND BUSINESS MANAGEMENT AND
ECONOMICS

Double Degree in Business Administration and Management and Labour Relations

Double Degree in Business Administration and Management and Labour Relations

Double Degree in Law and Administration and Business Management

Double Degree in Law and Administration and Business Management

First Degree in Business Administration and Management

Degree in Business Administration and Management

Academic year 2023-2024

1. IDENTIFYING DATA					
Degree	DOUBLE DEGREE IN ADMINISTRATION AND BUSINESS MANAGEMENT AND ECONOMICS Double Degree in Business Administration and Management and Labour Relations Double Degree in Business Administration and Management and Labour Relations Double Degree in Law and Administration and Business Management Double Degree in Law and Administration and Business Management First Degree in Business Administration and Management Degree in Business Administration and Management			Type and Year	Core. Year 1 Core. Year 1
Faculty	Faculty of Economics and Business Studies				
Discipline	STATISTICS Subject Area: Statistics Basic Training Module				
Course unit title and code	G343 - Statistics I				
Number of ECTS credits allocated	6	Term	Semester based (1)		
Knowledge Field					
Web					
Language of instruction	Spanish	English Friendly	No	Mode of delivery	Face-to-face

Department	DPTO. ECONOMIA
Name of lecturer	MARTA GUIJARRO GARVI
E-mail	marta.guijarro@unican.es
Office	Edificio de las Facultades de Derecho y Ciencias Económicas y Empresariales. Planta: + 1. DESPACHO MARTA GUIJARRO GARVI (E159)
Other lecturers	MARIA DEL PILAR SABARIEGO ARENAS CARMEN TRUEBA SALAS MERCEDES TEJERIA MARTINEZ JOSE MIGUEL FRAILE MUÑOZ LORENA REMUZGO PEREZ

4. OBJECTIVES

Conceptual objectives:

To know the main concepts about statistical information

To understand and know the theoretical and practical foundations of descriptive statistics and the calculation of probabilities

Procedural objectives:

To use computers in the resolution of descriptive statistics problems

To interpret the results of a statistical analysis

Attitudinal objectives:

To achieve personal autonomy

To develop capacity to work in teams

6. SUBJECT PROGRAM

CONTENTS

1	ONE VARIABLE ANALYSIS One-Dimensional Frequency Distributions Position and dispersion measures Shape and concentration measures
2	BIVARIATE ANALYSIS Two-dimensional frequency distributions Linear regression Categorical data analysis
3	ANALYSIS OF VARIABLES OVER TIME Index numbers and rates of change
4	PROBABILITY Introduction to probability

7. ASSESSMENT METHODS AND CRITERIA				
Description	Type	Final Eval.	Reassessn	%
Test 1	Written exam	No	Yes	30,00
Test 2	Written exam	No	Yes	45,00
Test 3	Others	No	Yes	25,00
TOTAL				100,00

Observations

If a student does not pass the course under the continuous assessment framework, he/she could take another exam that includes all the contents of the course during the reassessment period. The course grade will be the weighted average of the scores obtained in two tests: one theoretical-practical test and one laboratory test, according to the weights of the continuous assessment framework (75 and 25 percent, respectively).

Those students that, via student exchange programs, spent the semester in another university will be considered as part-time students.

If the health and educational authorities establish the full suspension of the face-to-face learning, students will be remotely evaluated using the Moodle platform.

Observations for part-time students

Part-time students could pass this course in just one evaluation session on the date reserved at the end of the first semester. The course grade will be the weighted average of the scores obtained in two tests: one theoretical-practical test and one laboratory test, according to the weights of the continuous assessment framework (75 and 25 percent, respectively).

If a part-time student takes any of the evaluation tests described above, he would be automatically renouncing to the evaluation for part-time students and will be evaluated under the continuous assessment framework.

Part-time students that do not pass the course under the continuous assessment framework could take another exam that includes all the contents of the course during the reassessment period. The course grade will be the weighted average of the scores obtained in two tests: one theoretical-practical test and one laboratory test, according to the weights of the continuous assessment framework (75 and 25 percent, respectively).

If the health and educational authorities establish the full suspension of the face-to-face learning, students will be remotely evaluated using the Moodle platform.
