

SUBJECT TEACHING GUIDE

G762 - Foundations and Concrete for Machines and Structures

Degree in Mechanical Engineering

Academic year 2023-2024

1. IDENTIFYING DATA									
Degree	Degree in Mechanical Engineering				Type and Year	Optional. Year 4			
Faculty	School of Industrial Engineering and Telecommunications								
Discipline	Subject Area: Structures and Industrial Installations Optional Module: Mechanical Engineering								
Course unit title and code	G762 - Foundations and Concrete for Machines and Structures								
Number of ECTS credits allocated	6	Term Semeste		er based (1)					
Web									
Language of instruction	Spanish	English Friendly	No	Mode of	delivery	Face-to-face			

Department	DPTO. INGENIERIA ESTRUCTURAL Y MECANICA	
Name of lecturer	IGNACIO LOMBILLO VOZMEDIANO	
E-mail	ignacio.lombillo@unican.es	
Office	E.T.S. de Ingenieros de Caminos, Canales y Puertos. Planta: + 2. ALUMNOS DOCTORADO (2068)	
Other lecturers	YOSBEL BOFFILL ORAMA HAYDEE BLANCO WONG	

3.1 LEARNING OUTCOMES

- - Ability for analysis and testing of foundations and other structural elements of reinforced concrete.

4. OBJECTIVES

Apply the safety criteria to the foundations and reinforced concrete structures.

Identify and assess the actions to be taken in account in the project for foundations and reinforced concrete structures.

Design structural components of reinforced concrete in Ultimate Limit State.

Design structural components of reinforced concrete in Serviceability Limit State.

Learn about aspects related to the execution and control of reinforced concrete structures.

6. COL	6. COURSE ORGANIZATION					
	CONTENTS					
1	Introduction to geotechnical engineering. Superficial and deep foundations. Retaining structures.					
2	Bases of the project of reinforced concrete structures. Actions. Materials. Durability criteria.					
3	Ultimate Limit State.					
4	Serviceability Limit State.					
5	Execution and control of reinforced concrete structures.					
6	Technological aspects of reinforced concrete structural elements: superficial and deep foundations, retaining structures, beams, columns, floor slabs.					

7. ASSESSMENT METHODS AND CRITERIA								
Description	Туре	Final Eval.	Reassessn	%				
Activities carried out in class during the course.	Others	No	No	20,00				
Practices	Work	No	Yes	50,00				
Written exam (theoretical - practical)	Written exam	No	Yes	30,00				
TOTAL 100,00								
Observations								
In case of COVID-19 health alert makes impossible to carry out the assessment in person, it may be carried out remotely.								
Observations for part-time students								
In the case of part-time course students, the evaluation consists on a written exam (theoretical - practical).								

8. BIBLIOGRAPHY AND TEACHING MATERIALS

BASIC

Apuntes docentes de la asignatura.

Hormigón armado. Jiménez Montoya P. et al. Editorial Gustavo Gili. ISBN:84-252-1825-X

Cálculo de estructuras de cimentación. J. Calavera. Intemac. ISBN: 84-88764-09-X
