3.1 RESULTADOS DE APRENDIZAJE

- To know the fundamentals of foreign exchange market and manage exchange rates
- Being able to analyze the parity of the different currencies
- To know the mechanisms of hedging risk and be able to apply them in practice
- To know the implications of the existence of international financial markets
- To understand the effect the international activity has on financing and investment decisions

4. OBJETIVOS

In a globalized world, knowing how international markets work is crucial in order to develop a successful professional career in the field of economics and business administration.

The objective of the course is to provide the student with the necessary instruments to interpret the concepts and models of Financial Theory in the context of international relations and analyze practical situations in exchange rate risk management .

Specifically, the students will be able to understand the Foreign Exchange Market and international parity relationships. In addition, they will be able to analyze risk, as well as use financial derivatives to hedge it.

In the second Part, the students will study the fundamental concepts of international capital markets and the influence that this environment exerts on the financing and investment decisions of the company. This will provide them with a global understanding of the effect that international activity has on the main financial decisions of the company , a fundamental aspect for the development of their professional career in the future.

All this will be done with an eminently practical and applied approach, which also allows students to develop the skills and abilities necessary to improve their performance for their incorporation into the labour market. Specifically, students will learn to solve complex problems using Excel spreadsheet, to automate processes through programming, or to use simulation models to analyse financial problems, enhancing their ability to work in groups using the necessary tools to solve the problems.

Descripción	Tipología	Eval. Final	Recuper.	%
Practical group work	Trabajo	No	Sí	30,00
Continuous assessment activities	Otros	No	No	10,00
Partial Exam Part I	Examen escrito	No	Sí	30,00
Partial Exam Part II	Examen escrito	Sí	Sí	30,00
TOTAL				100,00

Observaciones

The course is designed to follow an approach of continuous assessment throughout the semester, so that continued attendance and completing intermediate tasks are necessary. Daily control assistance will be made, although the attendance is not part of the evaluation.

All partial qualifications, if successfully overcome, will form the final grade for the course, be necessary to obtain at least 5 points rating of 10.

To carry out the work throughout the semester students will form groups during the first two weeks .

The first day of class all the details related to the evaluation, the formation of groups and the necessary considerations to pass the subject will be explained. The students will have detailed instructions that will develop what is established in this teaching guide.

Students who fail the course in the first call will be allowed to take the second call to retrieve all failed parts (all that have not reached a mark of 5 points).

Criterios de evaluación para estudiantes a tiempo parcial

Part-time students should contact the teacher in the first two weeks of class to analyze their situation.

If they wish, they can follow the continuous assessment with the same requirements as the rest of the students, but they must contact the teacher during the first two weeks to form groups as the other students.

Otherwise, they will be able to pass the subject obtaining more than 5 in a specific theoretical-practical final exam on all the contents of the course.
