3.1 LEARNING OUTCOMES

- Solving a general-equilibrium model and comparing it to the efficient allocation (planner's problem).
- Using dynamic models to evaluate public policies
- Improving the capacity to test economic theories using data.

4. OBJECTIVES

Objetivos

First this course is an introduction to dynamic macroeconomic models as a tool to address macroeconomic questions and policy evaluation. This course provides the base for other advance courses such as Economic Growth and Monetary and Financial Economics. Second the course addresses several important theoretical results related to consumption, fiscal policy, public pensions and business cycles. Finally the student learns how to evaluate empirically the economic models.

7. ASSESSMENT METHODS AND CRITERIA

Description	Type	Final Eval.	Reassessn	%
Final exam	Written exam	Yes	Yes	60,00
Partial exam	Written exam	No	Yes	20,00
Partial exam	Written exam	No	Yes	20,00
TOTAL				100,00
Observations				
In case the student fails to pass in June, the grade in September would be based 100% on the final exam.				
If the evaluation has to be online, the weight of each of the midterm exams would be 30% and the weight of the final exam would be 40%.				
Observations for part-time students				
Part-time students have two alternatives for their evaluation. First they can follow continuous evaluation as full-time students. Second they can choose to be graded exclusively by the final exam.
