4. OBJECTIVES
This subject is aiming at providing the student beginning to perform his/her Engineering degree with the knowledge and the understanding of the fundamental concepts, laws, and principles ruling the Mechanics.
To appreciate Physics as a way of understanding nature and to be able to judge orally the practical situations associated to the contents of the subject.
To identify the key points of a physical phenomenon and to analyse it through an experiment, bearing in mind the proposed model and the mathematical methods.
To analyse and present the obtained results taking into account the precision of the used instruments.
