Office	Edificio de las Facultades de Derecho y Ciencias Económicas y Empresariales. Planta: + 1. DESPACHO CONTRATADO DOCTOR (E148)
Other lecturers	RUBEN SAINZ GONZALEZ

3.1 LEARNING OUTCOMES

- Improve the knowledge of the the microeconomic fundamental concepts explained in Microeconomy I: efficiency, exogenous variables and endogenous variables, balance, comparative statics...
- Relate the theories of the decision of the consumers (theory of the demand) and of the companies (theory of the production and costs) with the structures of market of products and of productive factors.
- Understand, in economic terms, the differences between the different market structures , as well as the different implications, in terms of economic politics, which have each of them.
- Adopt a critical attitude with today's economic news related to the contents of the subject.
- Handle with fluency the microeconomic models seen in class. in order to relate them to other subjects, where the above mentioned models are a key tool for the comprehension of them
- Reason how the theoretical models explained in class can be confirmed empirically by econometrics models

4. OBJECTIVES

- Know the main theories and approaches of economic analysis to be able to explain the behavior of economic agents at a microeconomic level
- Know public institutions and the fiscal framework, to plan the decision-making of economic agents.
- Know the operation and regulation of product and factor markets on a national and international scale, as well as the determinants of income and wealth generation, in order to choose the combinations of factors that best suit the objectives pursued.

6. SUBJECT PROGRAM

7. ASSESSMENT METHODS AND CRITERIA

Description	Type	Final Eval.	Reassessn	%
A partial exam will be set. That exam will be worth 40% of the final mark. In the ordinary call, a final exam, worth 60% of the final mark will be done In the extraordinary call, all the exams may be recovered by taking a single exam on the extraordinary	Written exam	Yes	Yes	60,00
A partial exam will be set. That exam will be worth 40% of the final mark. In the ordinary call, a final exam, worth 60% of the final mark will be done In the extraordinary call, all the exams may be recovered by taking a single exam on the extraordinary	Written exam	No	Yes	40,00
TOTAL				100,00
Observations				
In the extraordinary call, all the exams may be recovered by taking a single exam on the entire subject that will be worth 100% of the final mark. Throughout the semester, voluntary experiments will be carried out in class. Throughout the semester, worksheets of the different blocks can be made and they can be given to the teachers. In the event that one had to move to online teaching, the evaluation exams would be the same, using the Moodle platform, as well as the electronic means provided by the University.				
Observations for part-time students				
Those students in a part-time dedication regime will undergo a single evaluation process that will consist of taking a written exam, which covers all the contents of the subject, and which will account for 100% of the evaluation
