

Dear Members of the UC Community,

In order to comply with our transparency policy, I am contacting you all again to provide you with the most recent information about the coronavirus Covid-19 associated issues:

1. As I said last week, there are not any sound reasons that justify the adoption of any extraordinary measures for the time being. The UC remains in permanent contact with both the Regional and National Health Departments so that their instructions are transmitted and implemented immediately.

2. Following the discontinuity of the academic activity in Italian universities last Wednesday, we have contacted our outgoing Erasmus students currently there once more with the most updated and detailed information and specifications from the Health authorities.

3. It is my wish to convey a message of calm and assure you all that, in case the current situation in Italian universities continues in a way that it can affect negatively the academic performance of our students, the University of Cantabria will guarantee the availability of all the necessary resources to make sure the above mentioned goals are attained. 4. We have just set up a specific section in our website (<https://web.unican.es/informacion-sobre-el-coronavirus-covid-19>), with the aim of making the information and instructions about Coronavirus, particularly those coming from the Health authorities, more accessible to our community. This site is open to all and it will be updated continuously.

Ángel Pazos,

Chancellor of University of Cantabria
